

CONFINED SPACE RESCUE TRAINING

CAPABILITY STATEMENT

8(a) Exp. 12-2028, ACDBE, DBE, EBE, EDWOSB, MWBE, SBE, SDB, **SDVOSB**, Iowa TSB, VOSB, WOB and WOSB

WHY CONFINED SPACE RESCUE PERSONNEL TRAINING

The primary role of rescue service personnel is to help authorized entrants escape from permit spaces. ACT Safe has hundreds of years' experience with Confined Spaces to include providing Rescue personnel with the skills and tools needed to safely, effectively and quickly manage the escape of an authorized entrant (or others). Knowledge and skills needed:

- Having the capability to reach victim
- Knowing how to use required PPE
- Completing authorized entrant training

WHAT SERVICES WE PROVIDE

Our team will work in tandem with your staff during classroom and practical / practice sessions to gain the required knowledge to:

1. Determine the hazards,
2. Develop plans and
3. Practice rescue drills until confident.

ACT focuses on areas of pertinent compliance that can have significant impact on the confined space, before entry, during entry and upon exiting the space.

Each space presents its own dynamic hazards and challenges. ACT Safe trains on the broad range of variances to include the shape of the space, retrieval equipment, processes and controls. Training covers all elements as defined by OSHA as well as the following sciences: biology, anatomy physiology, chemistry and physics. The learner goes away with a deep understanding and appreciation for the significant role they play during a confined space rescue.

ACT provides Practical Training.....
